

Advanced Laser Vaginal Tightening Now Available in Denver CO at Aguirre Specialty Care Pelvic Surgery & Intimate Aesthetics™

Renowned Board Certified Urogynecologist, Dr. Oscar A. Aguirre Now Offers Patients Non-Surgical Laser Vaginal Tightening For A Complete Intimate Makeover™.

Denver, CO ([PRWEB](#)) June 14, 2014 -- For over 15 years, Dr. Oscar A. Aguirre's specialty in Obstetrics and Gynecology as well as Female Pelvic Medicine and Reconstructive Surgery, have made him one of the most sought after professionals for intimate concerns in Denver, CO. Offering the largest variety of cosmetic gynecology procedures, Dr. Aguirre prides himself on being able to help patients achieve their cosmetic goals with the safest and most advanced technology available.

In addition to [Laser Vaginal Rejuvenation](#), The G-Shot, Labiaplasty, Hymenoplasty and the Real Mommy Makeover □, Laser Vaginal Tightening is the latest addition to provide patients with the ultimate [Intimate Makeover™](#). Correcting vaginal and urethral structures that can change drastically with age and childbirth provides not only renewed confidence but also enhances sexual enjoyment and relief from vaginal dryness and urinary incontinence.

Dr. Aguirre is proud to be the first to offer FemiLift™ in the United States. [Non-surgical Laser Vaginal Tightening with FemiLift™](#) is a breakthrough procedure, FDA-cleared for vaginal resurfacing. FemiLift™ Laser Vaginal Tightening works by inserting a very small laser probe into the vagina, which uses thermal energy to remodel vaginal tissue by stimulating the production of collagen and elastin, resulting in a more firm and tight vagina.

“I'm very excited to announce the arrival of Laser Vaginal Tightening here at Aguirre Specialty Care,” says Dr. Aguirre, “Being able to non-invasively address both internal and external intimate concerns is an enormous advancement I am pleased to offer my patients. This is a truly groundbreaking treatment that can enhance sexual pleasure as well as address stress urinary incontinence with no surgery, pain or downtime, in the comfort of our office.

Some patients who have already undergone the procedure report that it was pain free and that while sexual intercourse is to be avoided for a short time following the procedure, patients were able to comfortably resume daily activities with minimal downtime. Plus, Laser Vaginal Tightening in Denver, CO at Aguirre Specialty Care is proven to have long lasting results you can enjoy for years to come.

About Oscar A. Aguirre, MD

Dr. Aguirre is a fellowship-trained urogynecologist who has dedicated his entire surgical career to the evaluation and management of vaginal relaxation and bladder/bowel disorders. Dr. Aguirre is one of the first Board Certified Urogynecologists in the United States, recognized by the American Board of Obstetrics & Gynecology and its sub-specialty of Female Pelvic Medicine & Reconstructive Surgery (FPMRS). He is a skilled pelvic surgeon who has been providing urogynecologic care for more than 15 years and is an expert in addressing both women's functional and aesthetic concerns.

Urogynecology, also known as Female Pelvic Medicine and Reconstructive Surgery, is the newest specialty recognized by the American Board of Medical Examiners. Dr. Aguirre's expertise and exemplary care have been recognized by his colleagues having recently been named a Top Doc in Female Pelvic Medicine & Reconstructive Surgery for the second consecutive year in a row. Since early in his career, Dr. Aguirre has performed cosmetic gynecological procedures at the request of his urogynecologic patients. In 2006, he formally pursued his interest in the field of Female Genital Cosmetic Surgery (FGCS) under the supervision of world-renowned gynecologist, Dr. David Matlock of Beverly Hills. Dr. Matlock is the pioneer and developer of Laser Vaginal Rejuvenation ® (LVR®) and Laser Reduction Labiaplasty.

With this additional training, Dr. Aguirre became the third urogynecologist in the country to perform these aesthetic vaginal procedures and implement them at the time of urogynecological procedures to restore anatomical pelvic floor defects. In January of 2013 he presented at the 29th Annual Scientific Meeting of the American Academy of Cosmetic Surgeons attended by cosmetic and plastic surgeons from all over the world.

In May of 2011, Dr. Aguirre completed VASER® Hi Def Liposculpture training, becoming the third surgeon in Denver to offer this procedure to his patients. He then traveled to Colombia in September of 2012 for hands-on training with the inventor himself, world-renowned expert Dr. Alfredo Hoyos, to learn 4D LIPO the next generation of Hi-Def Liposculpture. This procedure uses a combination of liposuction to remove unwanted fat, Hi Def sculpting techniques to sculpt and create an athletic look to the body, Tummy Tuck to remove excess skin, and transfer of the fat to other areas such as the buttocks. Brazilian Butt Lift is the most commonly requested procedure at the time of VASER® 4D Lipo.

In November of 2011, Dr. Aguirre had the privilege of receiving training for minimally invasive abdominoplasty with liposuction with the highly esteemed, gynecologist and cosmetic surgeon Dr. Marco Pelosi II, who has been a prominent figure in women's health since 1975. With this training, Dr. Aguirre has become a master of the specialized, highly-sought after technique and he is able to offer yet another expertise to his patients.

Dr. Aguirre is a skilled pelvic surgeon who has been providing urogynecologic care for more than 15 years and is an expert in addressing both women's functional and aesthetic concerns. Women who have concerns with the appearance of their vulvar or vaginal function should seek out the care of an experienced urogynecologic specialist, best suited to identify and treat the underlying problem. Dr. Aguirre has two extra years of training in vaginal and pelvic floor surgery compared to most other gynecologists who perform vaginal rejuvenation. Likewise, most plastic surgeons have had little, if any, vaginal surgery training. As an associate of the Laser Vaginal Rejuvenation Institute of America, Dr. Aguirre is trained to perform these procedures and also boasts a broad background in pelvic reconstructive surgery.

About Aguirre Specialty Care ASC is a center of excellence for women, providing everything from urogynecologic procedures to aesthetic body contouring. Aguirre Specialty Care is located at 9800 Pyramid Court, Suite 300 in Englewood, CO. For more information, contact Aguirre Specialty Care at 303-322-0500 or visit <http://www.ascdenver.com>.
